

Earth Day Bracelet

Can you guess what each of the colored beads in your bracelet stands for?

Blue = Water
Clear = Air
Yellow = Sunshine
Brown = Soil
Green = Plants
Red = Animals
Heart = YOU!
Black = Pollution

The first six colors stand for different parts of the **environment** that work together to make up life on Earth. The last bead stands for **pollution**, the bad stuff that can harm the environment. But did you notice what stands between pollution and the environment? That's right. **YOU!**

Take a moment to think of at least **one way** that you can protect Earth's water, air, and soil from pollution today. **Now go out and do it!** And whenever you look at your bracelet remember that it is important to take care of the Earth not only on Earth Day, but every day of the year!
